Advanced Orthopedics and Sports Medicine Institute of Freehold, New Jersey Announces New Hip Replacement Technology with Superior Results

The orthopedic surgeons at Advanced Orthopedics and Sports Medicine Institute of Freehold, New Jersey are implementing the latest technology in hip replacement surgery, providing more intraoperative adjustability for the surgeon and improved results for the patient.

The orthopedic surgeons at Advanced Orthopedics and Sports Medicine Institute of Freehold, New Jersey are implementing the latest technology in hip replacement surgery. The Zimmer M/L Taper Hip Prosthesis with Kinectiv™ Technology allows the surgeons to select replacement components while performing surgery to fit each patient more precisely, providing superior results in terms of joint stability and range of motion.

"With more intraoperative choices," says Dr. Michael Greller, president of Advanced Orthopedics and Sports Medicine Institute, "we can obtain the best fit and stability for each and every patient." The Zimmer M/L Taper Hip Prosthesis with Kinectiv™ offers a broad range of component choices, which enables the surgeons to reconstruct the hip joint in a limited-view environment. The technology is used with minimally invasive surgical techniques and improved perioperative anesthesia, which speeds recovery.

The surgeons at Advanced Orthopedics and Sports Medicine Institute provide the Monmouth County community with specialists for every orthopedic need. Advanced Orthopedics and Sports Medicine Institute provides advanced medical care in Freehold, New Jersey with leading doctors and surgeons, state-of-the-art technology, and exceptional Patient-Centered, Patient-Focused Care™. The seven practicing physicians at AOSMI have a combined 100 years of experience providing exceptional orthopedic care to the New Jersey community of Monmouth County.
