Press Release

**May 1, 2008**

**Advances in Total Knee Replacement Surgery was the Topic of Presentation by Orthopedic Surgeon Dr. Manuel T. Banzon at CentraState in Freehold, New Jersey**

**Orthopedic surgeon Dr. Manuel T. Banzon gave a presentation on Total Knee Replacement on April 24 at the CentraState Ambulatory Campus in Freehold, New Jersey. Dr. Banzon is a partner and orthopedic surgeon at Advanced Orthopedics and Sports Medicine Institute in Freehold, NJ. [Advanced Orthopedics and Sports Medicine Institute](#) presents many lectures in the Monmouth County area of New Jersey.**

**Manuel T. Banzon, MD, an orthopedic surgeon in Freehold, New Jersey, was very pleased to share the Total Knee Replacement success stories at his public lecture, “Computer-Assisted, Minimally Invasive, Total Knee Replacement,” at CentraState’s Ambulatory Campus Conference Center last Thursday. He was the first to perform a computer-assisted knee replacement surgery at CentraState Medical Center using the CI System by iOrthopedics.**

**During the free public lecture, Dr. Banzon explained the advances in knee replacement surgery and the significant benefits of computer-assisted technology. The computer system uses cameras, tracking software, and specialized instruments, “mapping” the patients bones and ligaments during surgery. This visualization enables the surgeon to plan incisions and align the implant more precisely. The short-term results are smaller incisions and faster healing. In the long-term, patients are more likely to have satisfying outcomes with longer-lasting implants and fewer complications due to the more precise alignment.**

**Dr. Banzon began his orthopedic practice in Freehold in 1979 with the philosophy of providing high-quality and compassionate patient care. Locally, he pioneered the use of minimally invasive surgery (MIS) in conjunction with computer-assisted surgery (CAS) in total joint replacement. He has presented several well-received lectures during the past year in the Monmouth County area and enjoys dispersing the “good news” related to advancements in joint health. His fellow surgeons at [Advanced Orthopedics and Sports Medicine Institute](#) in Freehold, New Jersey regularly give**

informative presentations on orthopedic health as part of their commitment to the community. The free public lecture series conducted by the surgeons in the Monmouth County area last fall was very well received. Past lectures have covered joint health, sports medicine, joint pain management, and other orthopedic-related topics.

Today, the surgeons at **Advanced Orthopedics and Sports Medicine Institute** provide the Monmouth County community with specialists for every orthopedic need. **Advanced Orthopedics and Sports Medicine Institute** provides advanced medical care in Freehold, New Jersey with leading doctors and surgeons, state-of-the-art technology, and exceptional **Patient-Centered, Patient-Focused Care™**. The seven practicing physicians at **AOSMI** have a combined 100 years of experience providing exceptional orthopedic care to the New Jersey community of Monmouth County.
